

# Daniel Woodhead® Safeway+™ Wiring Devices

*Setting the standard for  
rugged, general purpose  
wiring device applications.*

5266-RB

Meeting the demands of industry, Daniel Woodhead® Safeway+™ Wiring Devices increase productivity and safety by providing:

- Quick, easy assembly
- Enhanced durability and protection with a unique rubberized-nylon design
- Unbeatable performance in a variety of rugged locations
- Code compliance at an economical price

A patented reversible cord clamp and impact-resistant rubberized-nylon shell make Safeway+ devices the most rugged, quick-assembly, general purpose devices on the market.

Safeway+ devices are able to withstand the abuses common in Industrial and Commercial Construction, Maintenance and Repair Operations, as well as General Purpose Applications. Upgraded materials and design set Safeway+ wiring devices at the top of the class for rugged duty performance.

5269-RB

## Performance Features

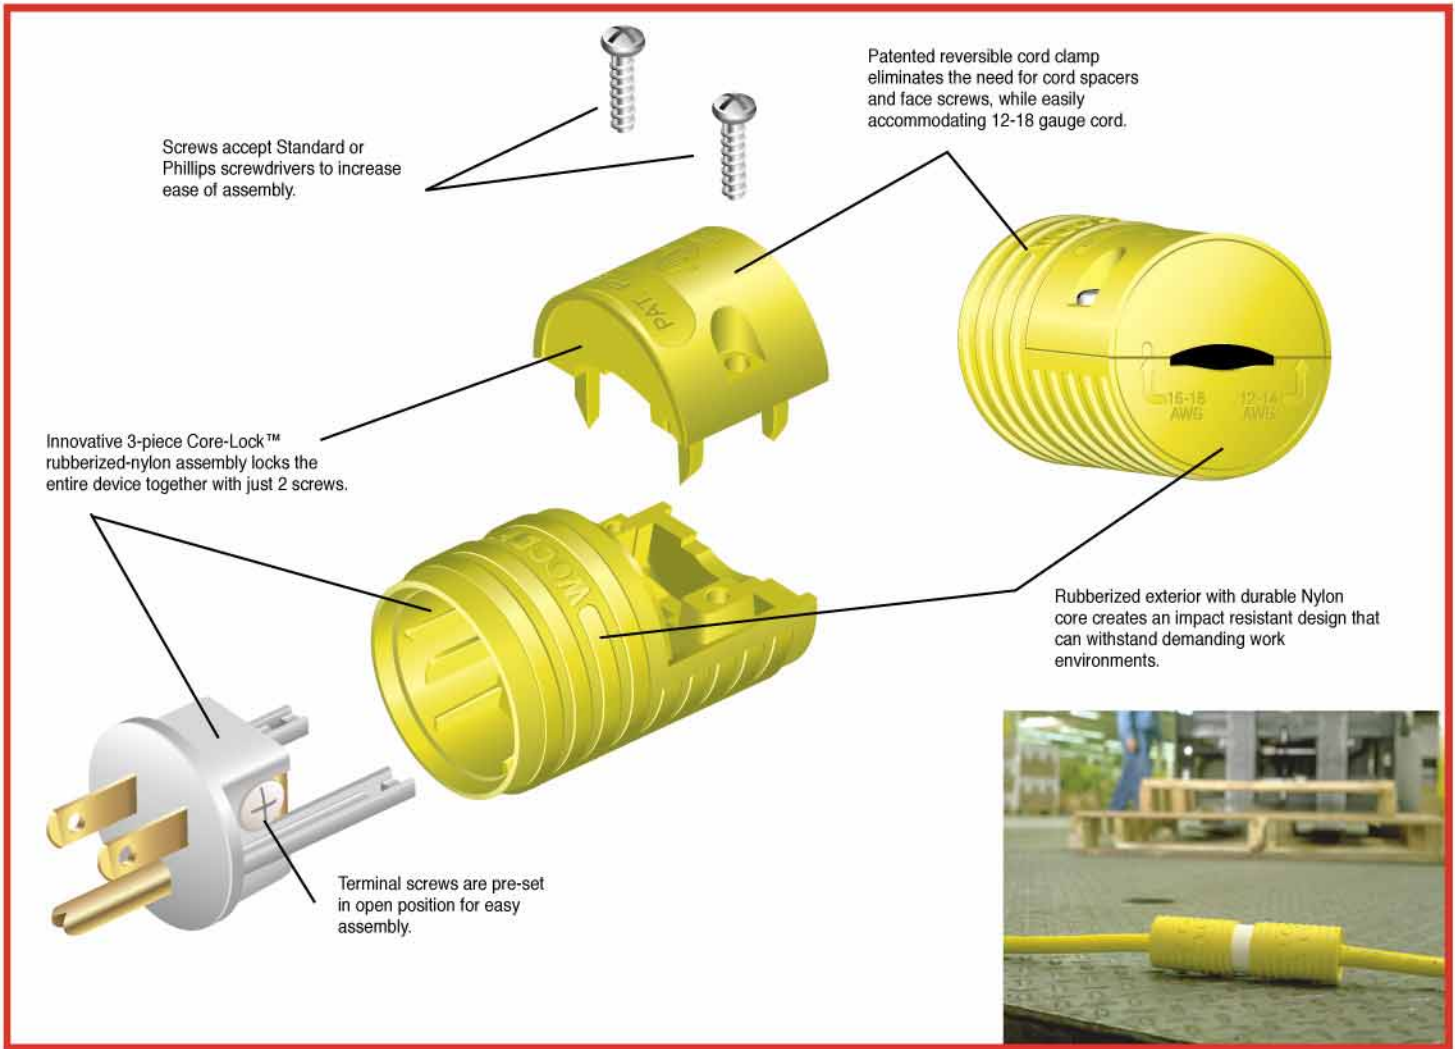

- Innovative 3-piece Core-Lock™ rubberized-nylon assembly locks the device together with just two screws eliminating the need for face screws
- Patented reversible cord clamp easily accommodates a full range of cords (12-18 gauge) eliminating the need for cord spacers
- Impact resistance of Nylon with the protection and ergonomic texture of Rubber
- Code compliant, UL/CUL LISTED product
- Available in 15A and 20A configurations
